

Unicel Architectural extends warranties for its Vision Control® louvers-between-glass solution

MONTREAL, Canada – January 19, 2016 – Unicel Architectural, the leading manufacturer of vision and daylight control solutions, today announced that it has increased the warranties for its Vision Control® integrated louvers solution. These include a 20-year warranty for interior applications and a 10-year warranty for exterior applications. Vision Control® is a patented, hermetically sealed insulating glass unit (IGU) combining louvers within glass for both interior and exterior glazing applications.

“Our Vision Control® units are field-proven for high performance and long-term durability,” said Jean-François Couturier, CEO of Unicel Architectural. “So it made sense to extend our warranty support to better reflect the product’s quality and longevity. Architects can specify Vision Control® with confidence for any privacy and daylight control design requirements knowing that it is backed by generous warranties.”

The extended warranties commence from the date of manufacture. Vision Control® insulating glass units are warranted not to develop, under normal conditions, material obstruction of vision as a result of dust or film formation on the internal glass surface caused by failure of the hermetic seal other than through glass breakage. Additionally, the warranties cover any internal parts for malfunction, mechanism failure or premature wear.

Vision Control® advanced louvered glazing technology eliminates strings and cords, ensures alignment, requires no maintenance and provides the ideal daylighting or privacy solution for commercial, residential, educational, healthcare or institutional environments. When installed in exterior applications, Vision Control® significantly reduces energy consumption in support of LEED® requirements. Vision Control® is a winner of The Architects’ Choice Award from the National Symposium on Healthcare Design and a Product Innovation Award from Architectural Products Magazine.

About Unicel Architectural

For 50 years, Unicel Architectural has built a reputation for the most advanced aluminum and glass solutions. These solutions encompass louvered glazing, skylights and more, to enhance major global construction initiatives with utmost quality and reliability. With its proprietary technology, Unicel’s Vision Control® delivers unprecedented comfort and control of vision, light, temperature and sound with a patented combination of louvers between glass that are hermetically sealed and cordless. Unicel’s solutions are guaranteed for longevity, optimized for energy efficiency, and customizable to any design, environmental or cultural requirements. Unicel combines its market leading know-how with great design to ensure optimal aesthetics and sustainable performance. For more information visit: www.unicelarchitectural.com
