

UNICEL
ARCHITECTURAL

Defining the
Space Within®

A Strong Track Record of Innovation

Vision Control® redefines privacy glazing with advanced integrated louver technology engineered to optimize privacy, daylight, thermal comfort, and acoustic control. Patented cordless louvers sealed within insulated glass units deliver smooth operation, superior hygiene, and long-term reliability.

Customized to Your Project Needs

AAMA 501.8 Performance Certification

Attack-resistant glazing and adaptable ligature-resistant operators offer protection to patients and staff in behavioral and mental health hospitals. Vision Control® and Vision Control® Mini have passed the AAMA 501.8 Behavioral Health Tests for 2000 ft-lbs of Human Impact on both interior and exterior applications.

Fire-Rated Glazing Solution

Vision Control® and Vision Control® Mini integrated cord-free louvers and Pilkington Pyrostop® fire-rated glazing provide unprecedented privacy control with fire-ratings of 20, 45, 60 and 90 minutes for doors, windows, transoms and sidelights.

X-Ray Shielding

Vision Control® and Vision Control® Mini can serve as an integral part of an x-ray room viewing window. Both systems can incorporate leaded glass to provide x-ray shielding.

Laser Radiation Protection

Vision Control® and Vision Control® Mini can serve as an integral part of a laser protective housing scheme. When the louvers are in closed position, both systems can block a wide range of lasers used in medical applications, operating in pulsed or continuous mode and up to 100W beam intensity.

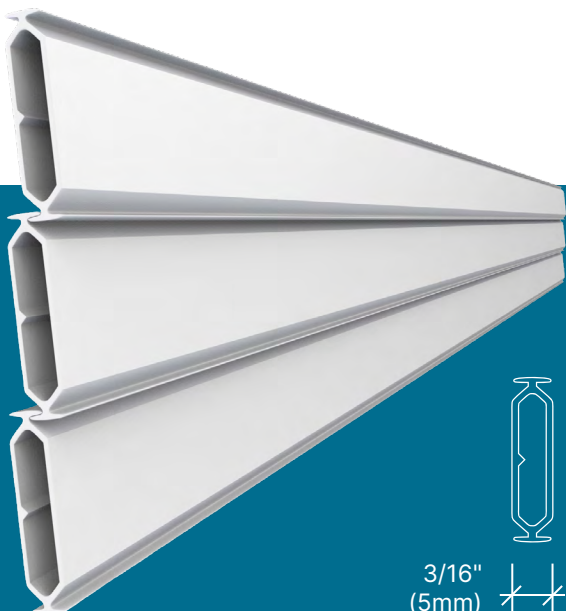

Smoke-Rated Sliding and Swing Doors

Vision Control® Mini can be used with UL 1784 certified sliding and swinging smoke rated door assemblies.

Certified for Hurricane Resistance

Unicel Architectural's hurricane-rated insulating glass units - including those outfitted with Vision Control® and Vision Control® Mini - comply with large and small missile impact requirements within Florida's High Velocity Hurricane Zone (HVHZ); also complies with Missile Level D and Wind Zone 4 (ASTM E1886, ASTM E1996).

Vision Control® Mini for Limited Glazing Depth Applications

Vision Control® Mini is specially designed for sliding doors, offering adjustable privacy, improved infection control, and perfectly aligned louvers. Unlike traditional curtains or blinds, it eliminates flapping and rattling caused by constant door movement.

Key Features

Patented, proprietary technology

20-year warranty

Highly cost-effective: Pays for itself

**Germ-free, Dust-free and
Maintenance-free**

**Meets HIPAA requirements for
doctor-patient privacy**

Ensures hygiene, privacy and comfort

The Markets We Serve

Behavioral and Mental Health

Ligature-resistant privacy solutions designed to support safer, calming behavioral and mental health environments with durable, tamper-resistant performance.

Healthcare

Solutions that support patient privacy, infection prevention, and staff efficiency while delivering reliable, long-term performance for hospitals and specialized care spaces.

Education

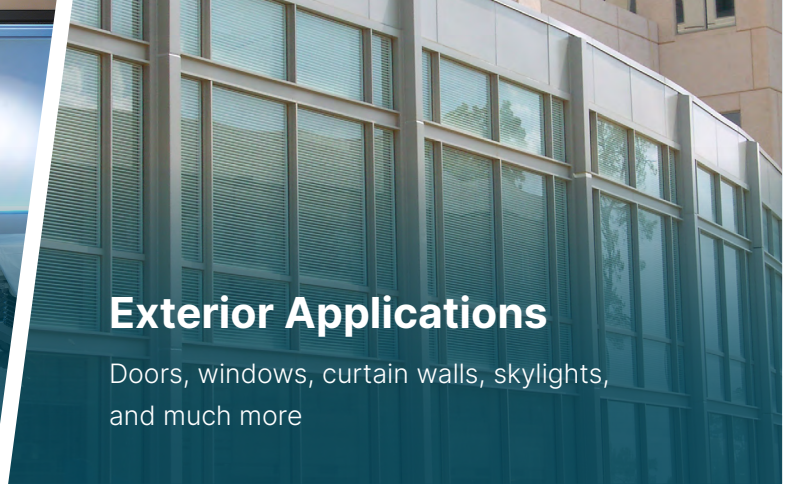

Solutions that enhance classroom safety and visibility for K-12 environments while helping reduce risks during active shooter situations.

Applications

Interior Applications

Interior partitions, borrowed lites, sidelites, swing doors, sliding doors, and more

Exterior Applications

Doors, windows, curtain walls, skylights, and much more

Let's define
spaces together
